

First prepare a USB by creating a folder/container named “ *theme* ”, inside it copy the . apk themes you are interested in. Here are some, but you can select/install only one at a time (it will be well explained later).

Disconnect internet and open the apk *Theme*

Select the light blue circled icon.

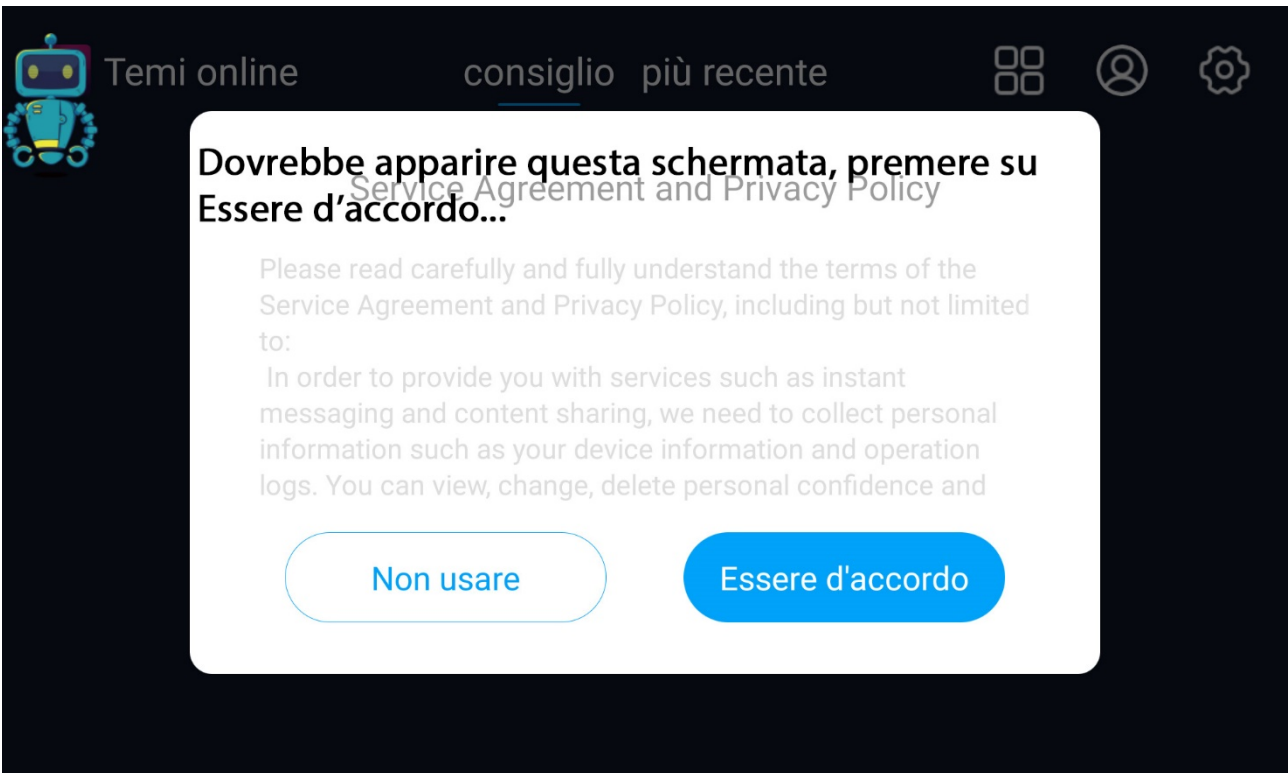

Clear application data.

Once the data is deleted, the car radio restarts immediately, showing the desktop with the default theme "free" without any other options.

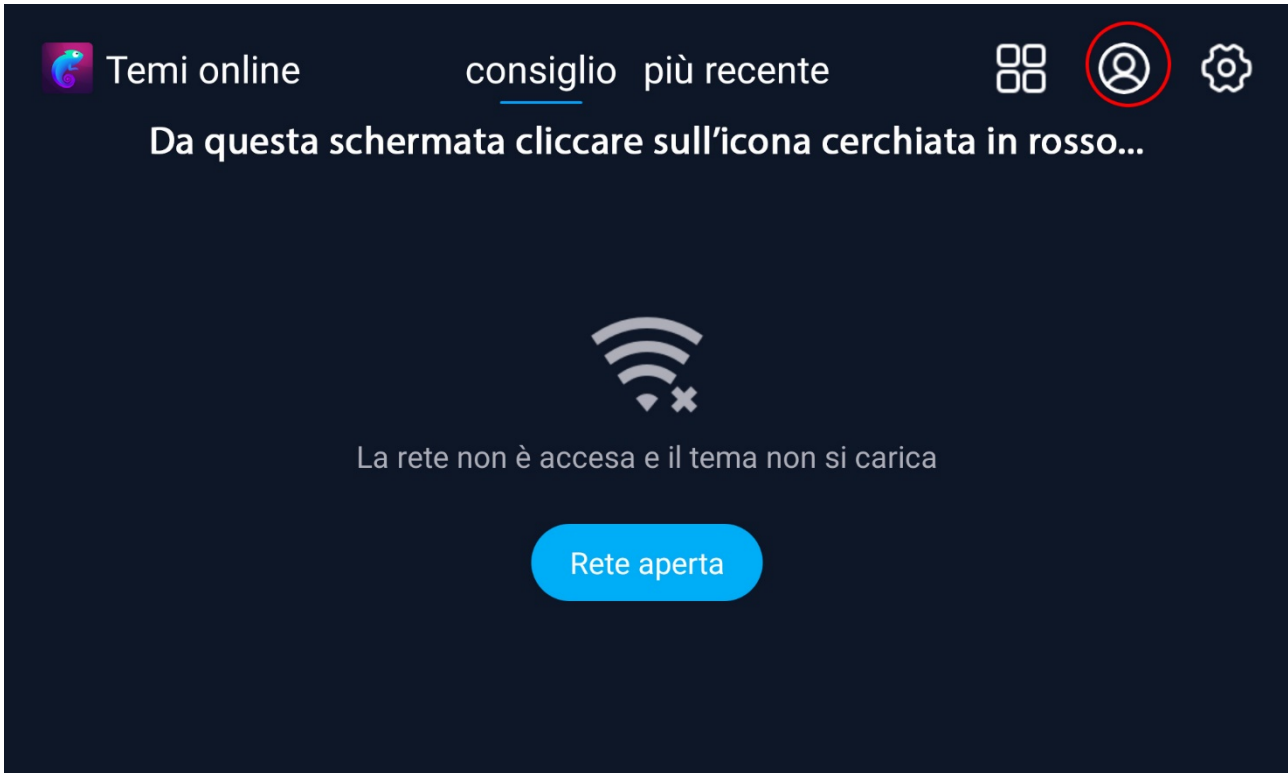

Go back into the *Theme application* ... this screen should open, confirm "Agree"

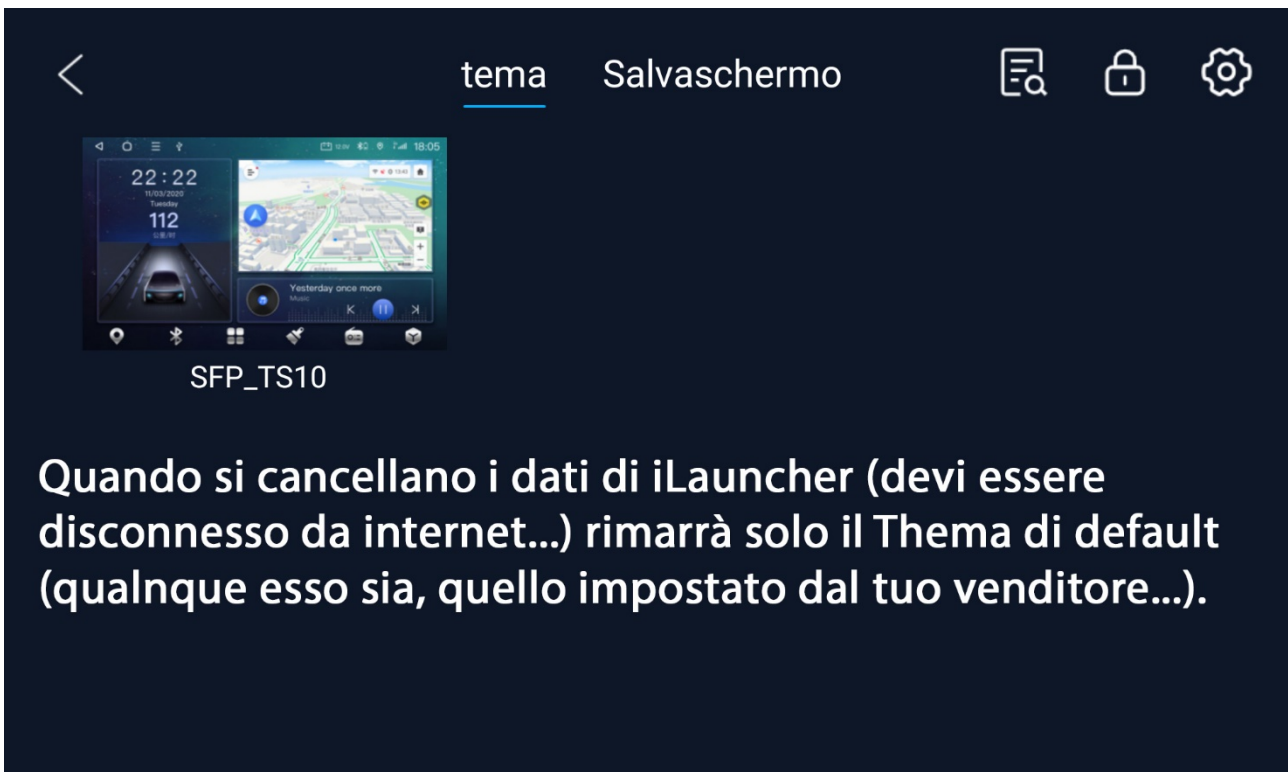

In this screen select the icon in the center circled in red

(here depicting a stylized person...)

As you can see, only the default theme remained, having deleted all the application data...

In this screen, hold down for a few seconds on the icon circled in red... a "pop-up" will appear to select the wording " U disk import "

SFP\_TW

Tenere premuto su l'icoma cerchiata in rosso, per qualche secondo, apparirà un "popap" con scritta: "U disk import" seleziona e vedi la schermata dell'immagine successiva...

On this window select the " U disk import " button, at this point, with the USB already connected to the car radio, the theme or themes that are inserted in the " theme " folder will open... not only in the USB but also those contained in the internal memory (same " theme " folder) of the car radio.

Selezionare "U disk import". A questo punto, con la USB già preparata e connessa all'autoradio, apparirà il tema o i temi che avrai inserito nella cartella "theme" della tua USB...

Device QR Code

Remarks:  
There is only 1 set of pointing themes per device, which cannot be imported  
Use U disk to import, in order to ensure that the theme is not lost, please connect to the Internet after importing  
If you need to change the device UI, enter change theme in the drive-in dialog box

From here on, all the themes in the “*theme*” folders are listed, as specified above...

U disk import

Theme

Carrellata temi di tutte le cartelle nominate “*theme*” sia della memoria interna autoradio che della USB

Import

After choosing the desired theme, select it and press “ *Import* ”...

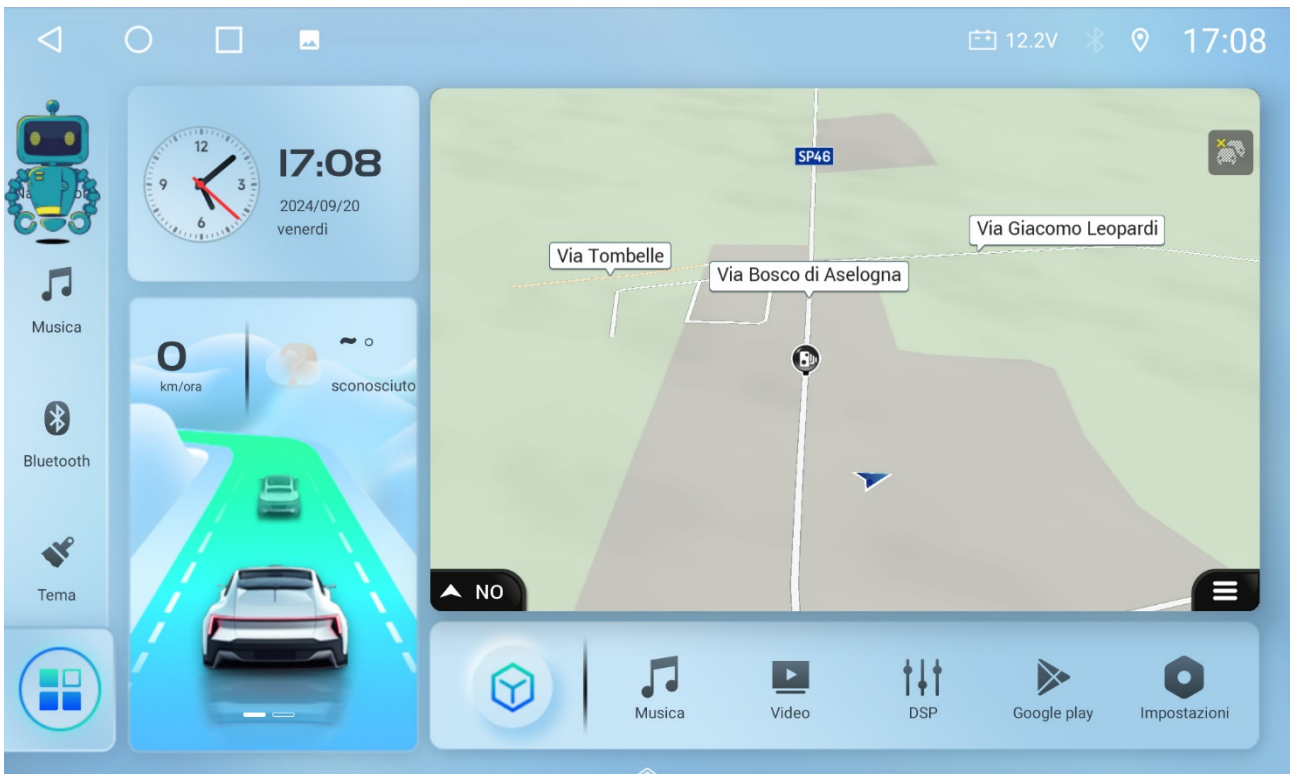

Tema scelto  
contornato in rosso,  
cliccare su Import.  
Ora puoi riattivare la  
connessione ad  
internet, ma non  
aggiornare l'APK  
iLauncher. (ogni  
tema che vorrai  
impostare dovrai  
compiere, in  
sequenza, tutte le  
operazioni fatte fino  
ad ora.

Enjoy

Enjoy the brand new beautiful theme you have chosen.

*Enjoy*

Edit : It is important to remember that the operations recorded in this  
“Tutor” were taken from a TS10 with firmware :
